

# MODULAR FLOATING DOCK

FLOATING TEMPORARY WORK PLATFORM

EQUIPMENT SPECIFICATION

## DESCRIPTION

Establishing safe personnel access is a key element of planning and execution of marine construction and marine infrastructure maintenance activities.

TAMS Group maintains a large inventory of moulded MDPE floating dock components that are assembled at the worksite to create mobile or fixed temporary floating work platforms to optimise safe worksite access and task execution productivity for a range of activities including inspection, structural repairs, sandblasting and painting and pile remediation.
