

OVERVIEW

Project Name	FMG Structural remediation
Client	Fortescue Metals Group
Site	Anderson Point, Port Hedland
Contract	FY22, FY23, FY24, FY25
Duration	4
Facility	TAMS Port Hedland Shore Base
Main Equipment	AMS Boss, TAMS9, Blast and Paint spread, Scissor barge, Work punts

TAMS were engaged over 4 separable financial years to execute structural remediation works at FMG’s Anderson Point Wharf assets within Port Hedland Harbour. Utilising our Port Hedland Shore Base for operational support the team were engaged to maintain the design life of FMGs wharf infrastructure, ensuring operational continuity for years to come.

DETAILS

TAMS designed a purpose built access system to reduce the risks associated with conventional scaffolding enabling acceleration of the works schedule.

Work scope included:

- Steelwork remediation
- Seaside rail replacement
- Dolphin remediation
- Fender replacement
- Landside walkway replacement
- Pile wrapping
- Concrete panel replacement
- Concrete treatment
- Wall sheeting and floor plate replacement
- Landside rail clip installation
- Diving services
- Blasting and Painting
- Hydro demolition
